DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Invention 1, claims 1-25 and 32-35, and cancellation of claims 26-31, in the reply filed on 06 June 2005 is acknowledged.

Information Disclosure Statement

The information disclosure statement filed 18 November 2004 is of electronic record and has been considered. However, no paper copy was available to Examiner. Therefore, a printout of the references considered is included with the present Action and Applicant is invited to send or resend a paper copy for signature by Examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11, 13-20, 22-25 and 32-35 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Huebner (5,545,162; cited by Applicant).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huebner (5,545,162; cited by Applicant).

Huebner clearly discloses the claimed invention except for the material explicitly being a superelastic metal such as nickel titanium alloy. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the device of Huebner with a known superelastic material such as nickel titanium alloy, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
